API Documentation

Manage your API tokens and integrate with our service.

You must enable two-factor authentication to create an API token.

My API Tokens

+ Create Token

Name	Status	Allowed IPs	Expires	Last Used	Actions

No API tokens yet. Click "Create Token" to get started.

You can create up to **1** active tokens. Currently using: **0**.

API Reference

Authentication

All API requests require authentication via your API token. You can pass it in two ways:

Header (recommended)

```
Authorization: Bearer YOUR_TOKEN
```

Query Parameter

```
GET /api/v1/socks/data?token=YOUR_TOKEN
```

Base URL

```
https://dichvusocks.net/api/v1
```

Endpoints

GET `/api/v1/user/info` — Get your account info

Response:

```
{
  "status": "success",
  "user": {
    "id": 1,
    "username": "example",
    "email": "user@example.com",
    "point": 100,
    "plan": 500,
    "totalView": 42,
    "timeLimit": 1735689600,
    "hasSubscription": true
  }
}
```

GET `/api/v1/socks/data` — List socks with filters

Parameters:

`country`	Filter by country (e.g. `United States`)
`region`	Filter by region/state
`city`	Filter by city
`auth`	`yes` / `no` / `all`
`useType`	Filter by use type
`blacklist`	Filter by blacklist status
`zipcode`	Filter by zipcode
`Host`	Search by hostname
`page`	Page number (default: 1)
`limit`	Per page (default: 20, max: 100)

GET `/api/v1/socks/countries` — List available countries

GET `/api/v1/socks/regions?country=United States` — List regions by country

GET `/api/v1/socks/cities?country=United States&region=California` — List cities

GET `/api/v1/socks/view?id=123` — View sock details (deducts balance)

⚠ This endpoint will deduct 1 view from your subscription or 1 credit point.

Response:

```
{
  "status": "success",
  "data": {
    "id": 123,
    "ip": "1.2.3.4",
    "port": "1080",
```

```
    "username": "",
    "password": "",
    "host": "isp.example.com",
    "country": "United States",
    "region": "California",
    "city": "Los Angeles",
    "zipcode": "90001",
    "speed": "fast",
    "useType": "Residential",
    "lastview": "Never"
  }
}
```

GET `/api/v1/socks/list24h` — Your viewed socks in last 24 hours

Error Responses

Code	Meaning
401	Invalid or missing token
403	Account banned or insufficient balance
404	Resource not found
429	Rate limited — too many requests
410	Sock is offline (removed)

Quick Example (cURL)

```
# Get socks list
curl -H "Authorization: Bearer YOUR_TOKEN" \
     "https://dichvusocks.net/api/v1/socks/data?country=United+States&limit=10"

# View a sock
curl -H "Authorization: Bearer YOUR_TOKEN" \
     "https://dichvusocks.net/api/v1/socks/view?id=123"

# Get your account info
curl -H "Authorization: Bearer YOUR_TOKEN" \
     "https://dichvusocks.net/api/v1/user/info"
```
